REFLECTIVE ANTI-SLIP TAPE 50MM X 5M

Overview

Improve Edge Visibility The reflective tape YT-72507 with a horizontal reflective strip in the middle is designed to enhance visibility and increase safety in traffic areas, on stairs, work platforms, and other high-traffic surfaces. The reflective element facilitates marking edges and areas that require special caution, especially in low-light conditions. Made of durable PVC, it creates a rough layer that improves shoe grip and reduces the risk of slipping. It performs well on smooth and heavily used surfaces in industrial, warehouse, and commercial facilities. The tape can be used indoors and outdoors. Resistance to varying temperature conditions and a durable adhesive layer ensure stable adhesion to the substrate and long-lasting use. It is used in production plants, warehouses, workshops, public utility facilities, and private spaces requiring improved movement safety. **Increases safety** Improves visibility Durable PVC Permanent installation For indoor and outdoor use Anti-slip surface improving safety when using stairs, platforms, and walkways Horizontal reflective strip increasing visibility of edges and communication areas Made from durable PVC resistant to abrasion and daily use Strong adhesive ensuring permanent attachment to smooth surfaces Can be used indoors and outdoors Temperature resistance ranging from -10°C to +70°C Dimensions of the tape: 50 mm x 5 m x 0.75 mm Easy installation without the need for additional tools Detailed Technical Data: Temperature resistance ranging from -10°C to +70°C Dimensions of the tape: 50 mm x 5 m x 0.75 mm

Key Points

- The reflective element facilitates marking edges and areas that require special caution, especially in low-light conditions.
- Made of durable PVC, it creates a rough layer that improves shoe grip and reduces the risk of slipping.
- It performs well on smooth and heavily used surfaces in industrial, warehouse, and commercial facilities.
- The tape can be used indoors and outdoors.

-
- Resistance to varying temperature conditions and a durable adhesive layer ensure stable adhesion to the substrate and long-lasting use.
 - It is used in production plants, warehouses, workshops, public utility facilities, and private spaces requiring improved movement safety.
 - Anti-slip surface improving safety when using stairs, platforms, and walkways
 - Horizontal reflective strip increasing visibility of edges and communication areas
 - Made from durable PVC resistant to abrasion and daily use
 - Strong adhesive ensuring permanent attachment to smooth surfaces
 - Can be used indoors and outdoors
 - Temperature resistance ranging from -10°C to +70°C
 - Dimensions of the tape: 50 mm x 5 m x 0.75 mm
 - Easy installation without the need for additional tools
