## STORM BLOWER 10.4M3/MIN 18V (BL MOTOR; BODY)

### Overview

The 18 V cordless blower YT-829383 is designed for quick cleaning and drying of surfaces, tools, and working elements. Its compact design and efficient brushless motor allow for the generation of a strong airflow while maintaining a lightweight device. The blower is ideal for workshop, assembly, service tasks, and for cleaning power tools, electronic devices, workstations, and hard-to-reach areas, such as roofing membranes or dusting walls. The device features a smooth speed control operated by the trigger pressure, a switch lock function for continuous operation, and a TURBO mode that allows for maximum blowing efficiency. The battery power enhances mobility and enables comfortable operation without a power cord. The set includes additional nozzles that allow you to adjust the airflow to the type of work being performed. Key product features: efficient cordless blower for cleaning, drying, and cooling components brushless motor ensuring high durability and effective operation maximum airflow speed: 198 km/h maximum airflow: 11 m<sup>3</sup>/min smooth speed control via the trigger switch TURBO function increasing blowing power switch lock for continuous operation compact and lightweight design for one-handed operation additional nozzles allowing for airflow characteristic adjustment battery power enhancing device mobility \* Battery and charger are not included in the set. Technical specifications: power supply: Li-Ion 18 V rotational speed: 22500-35000 rpm maximum airflow: 11 m<sup>3</sup>/min maximum airspeed: 198 km/h noise level: 102 dB operating temperature: from -10°C to +40°C device weight: 0.7 kg Applications: cleaning large surfaces of loose dirt drying cars after washing, detailing, and painting treatments cleaning tools and vehicles removing dust and shavings from workstations blowing out gaps, corners, and hard-to-reach places, e.g., radiators cleaning power tools after work from dust and residue removing moisture from mechanical and installation components assisting in service and assembly work dry cleaning of device housings, control cabinets, and electronic and electrical components Compatible YATO 18 V batteries: YT-828461 YT-828462 YT-828463 YT-828464 YT-828465

## Key Points

- efficient cordless blower for cleaning, drying, and cooling components
- brushless motor ensuring high durability and effective operation
- maximum airflow speed: 198 km/h
- maximum airflow: 11 m<sup>3</sup>/min
- smooth speed control via the trigger switch
- TURBO function increasing blowing power
- switch lock for continuous operation
- compact and lightweight design for one-handed operation
- additional nozzles allowing for airflow characteristic adjustment
- battery power enhancing device mobility
- power supply: Li-Ion 18 V
- rotational speed: 22500-35000 rpm
- maximum airspeed: 198 km/h
- noise level: 102 dB
- operating temperature: from -10°C to +40°C
- device weight: 0.7 kg
- cleaning large surfaces of loose dirt
- drying cars after washing, detailing, and painting treatments
- cleaning tools and vehicles
- removing dust and shavings from workstations
- blowing out gaps, corners, and hard-to-reach places, e.g., radiators
- cleaning power tools after work from dust and residue
- removing moisture from mechanical and installation components
- assisting in service and assembly work
- dry cleaning of device housings, control cabinets, and electronic and electrical components
