Description

The screw is made from carbon steel with blue-passivated zinc plating and is designed for flush fixing in timber and wood-based materials. The partial thread helps draw timber components tightly together during installation.

Key Features

- Countersunk head for flush installation in wood
- Partial thread for tightening timber components together
- High-performance wax coating for reduced screw-in torque
- Tip geometry designed for quick bite and pre-drilling
- Suitable for solid wood, glued-laminated timber, cross-laminated timber, veneer-laminated timber and wood-based panels

- Suitable for selected applications with Fischer plugs

Applications

- Load-bearing wooden constructions
- Connections between solid wood components
- Glued-laminated timber connections
- Cross-laminated timber connections
- Veneer-laminated timber connections
- Fixing metal fittings, angles and beam shoes to wood
- Fixing wood-based panels and similar glued wood components
