

Yato | Code YT-36119 | Sku 1036119

Hand Rivet Nut Tool

Overview

Riveting tool designed for making material connections by means of rivet nuts. Handles made of carbon steel. Body made of aluminum /ADC12/. Working head and pulling pin made of 40Cr chromium steel. Working range - rivet nuts from M5 to M12. The riveting tool makes connections of materials by means of an internally threaded sleeve. This allows you to screw additional elements with metal screws or bolts.
