Accessories Set for Oscillating Multitool

Overview

Set of blades (one round and two plunge) for multifunctional oscillating devices. They allow longitudinal and plunge cutting in wood, hardwood, metals, plastics and similar materials. The set includes 3 saw blades. Multifunctional oscillating tools and accessories from the Yato Quick Release System series allow for quick, tool-free replacement of accessories, making work much easier and faster. Yato Quick Release System accessories work best with compatible Yato equipment, especially YT-82220. Yato Quick Release System accessories are also compatible with most equipment available on the market, especially Bosch OIS-compatible tools. Even when used with a conventional Allen-screw attachment, Yato Quick Release System accessories make work easier because they can be attached when the screw is loosened, rather than fully removed as is the case with competitors' accessories. Multifunctional oscillating tools are the most versatile tools on the market. Using Yato's wide range of accessories, they can be used for cutting, plunge-cutting, sanding, removing mortar and adhesives, scraping off paint coatings and working in places that are inaccessible to other equipment. They achieve all this thanks to high-frequency oscillation of the accessory, so you retain full control over the tool (there is no "recoil" typical of rotary cutting) and with minimal vibration. In the case of multifunction tools, it is the accessory that determines the usefulness of the device. It extends its capabilities, and the quality of the accessory has the greatest impact on the performance of the equipment. Convenience is also very important, and any user of a device with tool-less accessory replacement will appreciate this feature. Set contents: 1 HCS plunge blade for wood 34x40mm, 1 BIM plunge blade for hardwood/metal 34x40mm, 1 HSS round blade for hardwood/metal 88mm.

Key Technical Specifications

For	YT-82220, YT-82818, YT-82900
Pcs	3
Brand	Yato
Width	34, 34 mm

Length	40, 40 mm
Symbol	YT-34691
Diameter	88 mm
Material	HSS, HCS, bimetal
Application	cutting, wood, plastic, metal, gypsum, epoxy resin
Set includes	HSS round saw blade (88 mm), HCS plunge saw blade (40x34 mm), bi-metal plunge saw blade (40x34 mm)
Producer code	5906083346910
Quick release	yes
Compatible with	YATO, Bosch OIS, Skill, Dremel, Black & Decker, Power Up

Key Points

- Set of 3 saw blades: round and two plunge blades
- Enables longitudinal and plunge cutting in wood, hardwood, metals and plastics
- Yato Quick Release System for quick, tool-free accessory replacement
- Compatible with YATO, Bosch OIS, Skill, Dremel, Black & Decker and Power Up tools
- Includes HSS round blade (88 mm), HCS plunge blade (40x34 mm) and bi-metal plunge blade (40x34 mm)

Warnings

- Warning! Always use personal protective equipment at work.
