PLUNGE CUTTING SAW BLADE FOR OSCILLATING MULTITOOL HCS

Overview

This accessory for the oscillating multitool is designed to make plunge cuts in soft materials such as wood or plastic. It comes with 3 saw blades. Multifunction oscillating tools and accessories from the Yato Quick Release System series allow for quick, tool-less accessory changes, making work much easier and faster. Yato Quick Release System accessories work best with compatible Yato equipment, especially YT-82220. Also, Yato Quick Release System accessories are compatible with most equipment available on the market, especially with Bosch OIS-compatible tools. Yato Quick Release system accessories, even when used with a conventional allen-screw attachment, make work easier because they can be attached when the screw is loosened, rather than when the screw is fully removed, as is the case with competitors' accessories. Multifunctional oscillating tools are the most versatile tools on the market. Using Yato's wide range of accessories, they can be used for cutting, plunge-cutting, sanding, removing mortar and adhesives, scraping off paint coatings and working in places that are inaccessible to other equipment. They achieve all this thanks to high-frequency oscillation of the accessory, so you retain full control over the tool (there is no 'recoil' typical of rotary cutting) and with minimal vibration. In the case of multifunction tools, it is the accessory that determines the usefulness of the device. It extends its capabilities, but also the quality of the accessory has the greatest impact on the performance of the equipment. Convenience is also very important; any user of the device with the ability to change accessories without tools will appreciate this feature. Usage warnings: Warning! Always use personal safety equipment at work.

Key Technical Specifications

For YT-82220, YT-82818, YT-82900

Pcs 3

Type simple

Brand	Yato
Width	34 mm
Length	40 mm
Symbol	YT-34685
Material	HCS
Application	cutting, wood, plastic, gypsum
Producer code	5906083346859
Quick release	yes
Compatible with	YATO, Bosch OIS, Skill, Dremel, Black & Decker, Power Up

Key Points

- Designed for plunge cuts in soft materials such as wood, plastic and gypsum
- Set of 3 saw blades made of HCS
