Pipe Bender 18 mm

Overview

The YT-21846 pipe bender is a professional tool for bending pipes at angles up to 180° without crushing them. Its durable aluminum body ensures longevity and reliability. An embossed protractor allows accurate determination of the bend angle, while sturdy steel arms guarantee stability during operation. A locking mechanism facilitates bending of even short pipe sections. The comfortable non-slip PVC handle provides a secure grip. Compatible with pipes made of copper, aluminum, soft steel, and brass.

Key Technical Specifications

Body Material	Aluminum
Pipe Diameter	23/32" (18 mm)
Handle Material	PVC
Maximum Bending Angle	180°
Compatible Pipe Materials	Copper, aluminum, mild steel, brass

Key Points

- Bends pipes at angles up to 180° without crushing
- Durable high-quality aluminum body for long service life
- Embossed protractor for precise angle measurement
- Sturdy steel arms for stability during operation
- Locking mechanism enables bending of short pipe sections
- Comfortable non-slip PVC handle for safe grip
- Compatible with copper, aluminum, soft steel, and brass pipes
- Pipe diameter: 23/32" (18 mm)

Warnings

- Always use personal protective equipment while working.
