Torque Wrench 3/8" 10-60 Nm

Overview

The torque wrench is designed for precise fastening and tightening of threaded connections with a precisely defined torque force. Recommended for automotive service.

Key Technical Specifications

Length	362-385 mm
Tolerance	CW $\pm 3\%$, CCW $\pm 3\%$
Drive size	3/8" (9.5 mm)
Application	Precise tightening of threaded connections
Torque range	10-60 Nm
Head material	42CrMo
Handle material	30CrMo, PVC
Rotation switch	Yes
Certificate of calibration	Yes

Key Points

- Made of durable steel
- Resistant to dirt, impact and heat
- Torque scale on the wrench handle for convenient reading
- Locking mechanism prevents accidental torque changes
- Rubberized handle provides good grip
- Supplied in a carrying case
- Includes calibration certificate

Warnings

- Always use personal protective equipment when working.
