Double Spiral Mixer

Overview

Double spiral mixer is used for mixing adhesive mortars, masonry mortars, screed, structural plasters, putty masses and insulating masses. Works with mixers or drills. Made of galvanized steel with an SDS Plus shank. A special auger profile ensures quick and thorough mixing of the mass. Suitable for renovation and construction works.

Key Technical Specifications

Length	600 mm
Diameter	100 mm
Material	Steel
Shank Type	SDS Plus
Application	Adhesive mortars, masonry mortars, screed, structural plasters, putties, insulating masses
Surface Finish	Galvanized
Max. Mixing Capacity	10–20 kg

Key Points

- Designed for mixing adhesive mortars, masonry mortars, screed, structural plasters, putties, and insulating masses
- Compatible with mixers and drills
- SDS Plus shank for secure tool-holder connection
- Made of galvanized steel for durability and corrosion resistance
- Special spiral profile ensures fast and thorough mixing
- Suitable for renovation and construction applications
- Diameter: 100 mm | Length: 600 mm | Max. mixing capacity: 10–20 kg

Warnings

- Use of hand tools may be dangerous — always wear personal protective equipment
- Use only proper, undamaged tools
- Select the correct tool type and size for the intended application
- Do not overload tools
- Keep tools away from children
- Handle tools with proper care
